

**REMARKS**

In response to the Restriction Requirement mailed 23 August 2005, Applicant traverses the restriction requirement as presented in the Office Action. For one example, Applicant traverses the statement in the Office Action that “[c]urrently, there is no generic claim.” Applicant submits that claim 19 is generic to the instant claims 13-18 and 20-50. Claims 13-18 and 20-50 include features such that these claims may be patentable for reasons in addition to the patentability of claim 19.

Further, Applicant submits that the restriction requirement as presented in the instant Office Action is improper. A restricted requirement should be based on differences between the claims of an application. Features of a claim shown in the figures may be shown in more than one figure. Therefore, the restriction requirement, as presented, based on the various figures in the instant application is improper.

Applicant elects the species that includes at least claims 19-25. Applicant respectfully reserves the right to reintroduce the non-elected claims for reconsideration in this application upon the allowance of a generic claim or a linking claim, or to reintroduce them in a divisional application at a later date.

The Examiner is invited to contact Applicant's Representatives at the below-listed telephone number if there are any questions regarding this Response or if prosecution of this application may be assisted thereby.
